

REMARKS

The claims have been carefully reviewed in light of the Examiner's action.

During the telephone interview with the Examiner on September 15, 2005 it was agreed, that claim 11/37 would be allowed, if only the claim 37 will be corrected as requested by the Examiner (i.e. the words "an" and "generator" be inserted in the appropriate places), and additionally that claim 42 can be amended by adding the word "/ desorbent" after the word "absorbent" (line 15), which makes it consistent with the words used in claims 9, 10, 37, and 38, and is supported by the Specification. (Munday's hydrogen supply system does not teach absorbent/desorbent). Claims 37-42 have been amended to overcome the objections to grammatical errors, and the rejections as being indefinite, as requested by the Examiner.

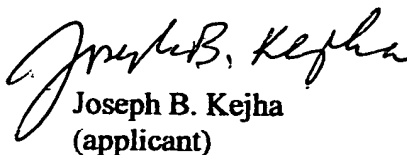

Claim 42 has been also amended as described above.

No new matter has been added.

At the time of allowance, applicant will cancel the claims directed to non-elected inventions, and before the time of allowance applicant will file two continuations in part of this application, which will include the claims 12-25.

It is believed, that the Amendment places this Application in condition for allowance and such action is requested and urged.

Respectfully submitted,

Joseph B. Kejha
(applicant)
